## PROFILE

Software developer that wants to make things that make a difference. My passion for coding allows me to build upon the tools I need to make a difference in the world by continuing to learn and grow every day.

## INDIVIDUAL PROJECTS

### INSTANT POT RECIPE SPOT - REACT

- Inspired by a love of quick cooking, and an annoyance of searching the endless void of the web for a decent recipe, Instant Pot Recipe Spot is a single-page application that allows recipe lovers to create new recipes, search for recipes, and add recipes to their own personalized favorites page
- . Front-End Capstone project built in React.js with JSON server for persistent data storage and Material-UI for styling.  
<https://bit.ly/2VKdN1Y>

### STAY SAFR - PYTHON

- Stay Safr gives users better peace of mind by allowing them to quickly view which establishments are taking the correct preventative measures to help stop the spread of COVID-19 by viewing their safety rating. Users can also do their part to help stop the spread by adding, rating, or commenting on a business.
- A server generated web app built using Python with Django web framework and styled with bootstrap.
- Django ORM methods were used to allow users to add new businesses and reviews to the database, filter and search businesses, and calculate average ratings.

## EDUCATION

**Nashville Software School**

Full Stack Software Developer 2020

**Baton Rouge Community College**

2010-2012

## EXPERIENCE

### NASHVILLE SOFTWARE SCHOOL

#### FULL STACK DEVELOPER | Jan 2020 - Present

*Intensive six-month full-stack software development bootcamp*

- Built browser-based, full-stack applications using HTML5, CSS3/Material-UI, JavaScript, React.js, SQL and Python/Django anchoring learning with both individual and team-based projects.
- Utilized GitHub for source version control and collaboration
- Used Agile and Scrum methodology to help teams focus on the current sprint's objectives and increase productivity.

#### GROUP PROJECTS <https://bit.ly/2Y5rIAG>

##### *Bangazon Workforce* <https://bit.ly/2UNx0if>

- Part two of a two-part sprint using Agile methods in a SCRUM environment.
- Worked closely with four other team members to build a Full-Stack web application providing e-commerce functionality including, browsing, buying, and selling products.
- Front-end built with React, JSX, and styled with CSS
- Back-end built with Python and Django Rest Framework
- Responsible for building the Home page, Orders, and Refer a friend components on the front-end, responsible for building the Order and Refer a friend endpoints on back-end.

### LOWE'S HOME IMPROVEMENT STORES

#### DELIVERY DRIVER | 2017-2019

- Printed order tickets and planned delivery routes for all trucks going out for the day.
- Ensured on-time, accurate, safe deliveries, and installations while providing exceptional service to customers in their homes.
- Built positive relationships with customers every day and ensured their needs were met.

### JUSTIN PAUL FINANCE

#### RECRUITING ASSISTANT | 2016-2017

- Spent a year helping out a local Recruiting Firm in my area
- My job was to build a database of Louisiana contractors and perform daily outreach to contractors for Recruiters.

### KONA GRILL

#### SERVER | 2013-2016

- Provided excellent customer service in a high-volume restaurant
