PROFESSIONAL SUMMARY

I strive to be a lifelong learner, in order to be the best that I can be in all aspects of my career. Everything I have experienced thus far was preparing me for software development, from learning several point of sale software programs, to face to face interaction with clients.

My diverse background allows me to have a unique perspective. Software development grants me the opportunity to consistently grow my skills, and strive to be the best in all that I do.

PROJECTS

Front-End Capstone: TradeYa!

github.com/molliegoforth818/TradeYa-capstone

TradeYa! is application that is designed for users to create group closets with their friends in order to trade closet items with one another.

- TradeYa! has full CRUD capabilities
- This application was built using React
- Styled utilizing CSS
- Used a local JSON server to execute API fetch calls

Back-End Capstone: Curb Alert

github.com/molliegoforth818/curbAlert-backend-capstone

Curb Alert is a web application that allows users to donate goods directly back into their community before taking it to a donation center.

- Curb Alert is a full-stack Django web application, utilizing Python, Django ORM, and Django Rest Framework
- Styled utilizing Bootstrap
- Used Leaflet for interactive maps
