Summary: An e-commerce marketplace clone created as a group project.
Responsibilities: Created the home page animation, built the task bar, and the messaging page. Designed UI. Handled Product CRUD,
Tools Used: HTML, CSS, REACT, Python, Django, SQL, Ant-Design

Ask about my side projects

ABOUT ME

Hello, I am Jeremy and I am here to help! I believe software has an unprecedented potential to heal and serve our species and planet, and I am incredibly grateful to be in the field. I am interested in building tools that people use, as opposed to tools that use people. Driven by curiosity, connection, and catharsis. I am excited for opportunities to learn, gain skills, and work with bright, talented, and passionate people.

SKILLS

- Exceptional communication and relational skills
- The ability to work under pressure while focusing on a single task or multi-tasking depending upon the need.
- Comfortable working individually and within a team.
- Can ask questions and create effective solutions in the face of ambiguity and uncertainty.

TECH EXPERIENCE

Nashville Software School
Full-stack Software Developer
JAN 2020 - PRESENT

Summary: Intensive full-time software development bootcamp focusing on full stack development fundamentals and problem solving.
- Source code version control with Git/GitHub
- Project management/tracking with Github Projects & Issue Tracking
- Application planning through white boarding dependency trees and building ERD's
- Built browser-based, single-page. front-end web apps using HTML, CSS, JS, React, and various styling libraries.
- Consistently taken lead in UI design and styling; enjoy bootstrap, semantic-ui, ant design, and custom css and sass.
- Building Python/Django API's using SQL and ORM
- Created and modified external database design/content using Parse Server and Back4App.
- Deployed applications through Heroku and Netlify.
- Utilized Jitsi Server for embedded video-communication

EDUCATION
