MICHAEL CLARK
SOFTWARE DEVELOPER

"I have spent my life in the pursuit of creation. Musical, photographic and experiential. In code, I've found the ultimate creative tool and in applications, the ultimate canvas. I've found levels of abstraction and metaphor akin to art and story, and levels of logic of which past mediums were woefully devoid. Code has provided me with a task, a community and a model of thought which continue to enrich and inspire me."

EXPERIENCE

NASHVILLE SOFTWARE SCHOOL
Jan 2020 to Present

A six month, full-time full-stack coding bootcamp which distinguishes itself by its utilization of group projects as well as individual.

- Front End Development using HTML, CSS, Javascript and React
- Back End Development with Python and Django
- Utilized third party APIs for web apps
- Responsible for CRUD functionality in individual and group projects
- Leveraged Slack and Zoom for remote study and group projects
- Secure code version control using Git / Github
- Project Management with Github Projects

INDIVIDUAL PROJECTS

h!pstar (*React.js*)

h!pstar is a movie recomendation app which allows users to connect on mutual hatred of movies. Users can search The Movie Database API to rate and comment on movies. Users with the most common distaste in film are matched and each user's positively rated films are recommended to the other.
